6. Reduce manual intervention in extracting TJQ data (NEW)
 - Manual login in Amadeus Selling Platform
 - Manual Jump to other office ID
 - Create blank excel file in exporting excel file
 - Check if ticket is outbound manila

II. Process Flow

III. User Interface

The screenshot displays the TJQ(s) application window. At the top, there's a title bar with 'TJQ' and a status icon. Below it, a navigation bar contains three buttons: 'Amadeus Selling Platform' (blue), 'Database' (yellow), and 'Setup' (grey). The main area is titled 'Search Parameters' and includes a dropdown menu, two date pickers (both set to 'Nov/10/2016'), radio buttons for 'PHP' and 'USD' (USD is selected), and 'Search' and 'Clear' buttons. Below this, there's a table with columns: SEQ NO, A/L, DOC NO, AMOUNT, TAX, FEE, COMM, FP, and PAX NAME. The table is currently empty. At the bottom right, there's an 'Export to Excel' button. The status bar at the very bottom shows 'Ready' on the left and '1.0' on the right.

Option Panel

This screenshot shows the 'Option Panel' of the TJQ(s) application. It features a navigation bar with three buttons: 'Amadeus Selling Platform' (blue), 'Database' (yellow), and 'Setup' (grey). The 'Amadeus Selling Platform' button is highlighted, indicating it is the selected option.

Here in Option Panel, you can select the data source of TJQ(s) whether from Amadeus Selling Platform or from local database. You can also save your login credentials in Amadeus Selling Platform in setup form. Once your credentials is save no need to memorize login commands in selling platform.

Search Panel

This screenshot shows the 'Search Panel' of the TJQ(s) application. It features a 'Search Parameters' section with a dropdown menu, two date pickers (both set to 'Nov/09/2016'), radio buttons for 'PHP' and 'USD' (USD is selected), and 'Search' and 'Clear' buttons. The 'Search' button is highlighted in green.

You can input your parameters in Search Panel for retrieving data from your selected data source.

Data Panel

MNLPH-210M	MNLPH-3501	MNLPH-3502						
SEQ NO	A/L	DOC NO	AMOUNT	TAX	FEE	COMM	FP	PAX NAME

All retrieved data from your selected data source is stored in Data Panel and categorized by its corresponding office ID where tickets was issued. To transfer to other table just click on header tab located at the upper part of the panel.

Notification Panel

Ready	1.0
Retrieving data from Amadeus Selling Platform - MNLPH3501	1.0
Database mode is not yet available	1.0
Done extracting TJQ data in Amadeus Selling Platform	1.0

Notification panel is the communication key of TJQ(s) to its user. Violet indicates standby or on process, Red indicates an error message and Blue indicate success message. You can also view the version no of TJQ(s) on the right part of this panel.

Setup Form

You can store your login credentials in Amadeus Selling Platform here in setup form.

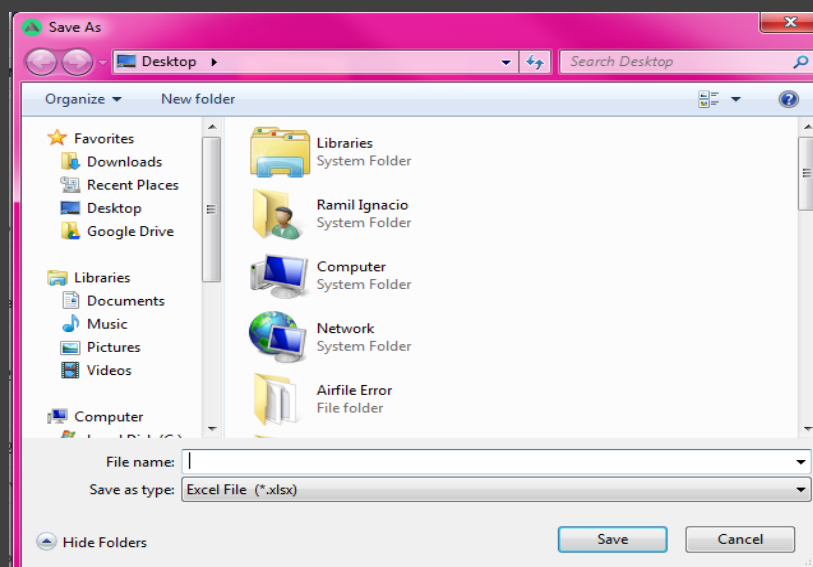

IV. User Manual

- If you will use Amadeus Selling Platform as your Data Source save first your login credentials in Setup Form (One time setup only, can change credentials anytime)
- Input search parameters in Search Panel then click Search button 
- Wait until TJQ(s) is finish extracting data from selected data source, once done this message will show on notification panel "Done extracting TJQ data".

Done extracting TJQ data in Amadeus Selling Platform

1.0

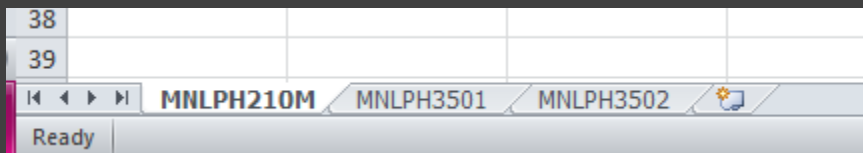

- For exporting retrieved data to excel file just click export to excel button 
- Then select the location where you want to save the excel file and input your prefer filename. (NEW)

Congratulations you successfully extracted TJQ data!

V. TJQ(s) Excel Format

TJQ(s) will only create one excel file contains TJQ data of three office IDs (MNLPH210M, MNLPH3501, MNLPH3502).

These are the following columns of TJQ(s) excel file

- Ticket No
- Date Issued
- Record Locator
- Booking Date
- Invoice No
- Invoice Date
- Airline Code
